

Aplication EKOMAX

This application EKOMAX allows effective use with energy control system DUEL. Through the application can monitor the current energy consumption in the place, the state of controlled circuits, required parameters etc., directly on your PC screen and gain an overview of the whole controlled facility. If necessary, you can change the setting of the controller and achieve the desired new parameters.

- Comfortable operation of the whole building from one location
- Monitoring of energy consumed in each regulated section
- Possibility of manual intervention the process control
- Setting limits parameters of regulation
- Recording of fault conditions
- Connection to the PC and Internet with statistical processing of data
- Modular system, mounting on 35 mm DIN rail
- Automatic storage of measured data to the database
- Graphics and color support when setting data
